PROJECTS

- TRAIN RESERVATION SYSTEM**
Our project is a website based on reservation of railway tickets by the passengers. In this website user will be able to search the train availability, the exact fare, the arrival and departure time of the train. It contains simple GUI for passengers. The various software requirements for this project include : HTML, CSS, Java script Python, Django.
- ONLINE RENTAL SYSTEM**
The aim of this project is to provide a user-friendly online platform that streamlines the rental process, enhances accessibility, and improves the overall renting experience. The Onlinerental system can help customers to buy a service quickly rather than coming to Smart design & Construction (pvt) Ltd .This System help to minimize wasting time ,effort and resource and also make the system secure. The various software requirements for this project include : C#.Net , Asp.Net with Ajax, SQL.
- MUSIC PLAYER SYSTEM**
Our project is a web page based on music player. In this website user will be able to search the music, explore the collection of songs. It contains simple GUI for user. Technologies used for this project: HTML, CSS
